-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 June 2002.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1 and 2 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-2 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

DETAILED ACTION

This communication is in response to applicant's 06/11/2002 amendment/responses in the application of **KREBS et al.** for "**ATM NETWORK MANAGEMENT SYTEM**" filed 07/07/1998. The amendments/response to the claims have been entered. No claims have been canceled. Claim 2 has been added. Claims 1-2 are now pending.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hearn et al. (US 5640505), hereinafter Hearn, in view of Admitted Prior Art, hereinafter APA.

Regarding claim 1, Hearn discloses a system relates to an operational support structure for a telecommunications network. The system comprises of a problem manager 143 (*fault manager*) for receiving fault report from the other domains, using information contained in the database 130 concerning the network topology, it **correlates these faults and identifies the problems which are causing them**. It many receives reports of faults from a set of switches and also a set of multiplexers. By retrieving data on the network topology from the database 130, **it can correlate these faults end might identify the problem which is causing the faults as being caused**

Art Unit: 2661

by failure of a particular multiplexer. The Identified problems are recorded in the database 136, and the manager 143 sends instructions (recommendation) to the traffic manager 138 (*an interference engine*), the service domain 14 or the traffic domain 18 to restore lost services and to remove problems (see figs. 2, 5; and col. 11 lines 21-34). Hearn et al., further disclose, this could be implemented in an ATM network (see col. 7 lines 36-52).

The traffic manager 138 also identifies traffic problems such as congestion on the network topology from database 130, data on traffic usage from database 132 and network problems from database 136, the traffic manager 138 finds solutions to traffic problems and then sends appropriate instructions to the other domain so as to reduce or overcome the problem (see col. 11 lines 37-47). The database 134 contains rules which are used in planning the network (see col. 11 lines 12-20).

Regarding claim 2, Hearn discloses providing sophisticated diagnostics of fault and performance management for multivendor ATM networks (see col. 5 line 33 to col. 6 line 8).

Hearn fails to explicitly disclose that the ATM management network includes security management.

In page 2 line 4-7 of the specification, the APA discloses that a "classical" definition of network management includes security management.

Therefore, it would have been obvious to one having ordinary skill in the art at the time of invention was made to includes the security management the system taught

Art Unit: 2661

by Hearn for providing secure transmission of customers account information in the network.

Response to Arguments

Applicant's arguments filed 6/11/2002 have been fully considered but they are not persuasive.

In pages 1-2 the Applicant argued that:

As argued in applicants' Brief on Appeal, the claims include the steps of using an inference engine fault manager including correlation of ATM switch failures and traps and automating recommended courses of corrective action using an inference engine for the performance of ATM management networks. Neither the problem manager nor the traffic manager nor the performance manager of Hearn et al (US 5,640,505) is characterized as being an expert system or an inference engine. Hence, it is not clear that the reference utilizes an inference engine fault manager including correlation of ATM switch failures and traps and automating recommended courses of corrective action or that there is an inference engine used for the performance management of the ATM management network. In fact, the terms "inference" and "expert" do not appear in the Hearn et al disclosure.

In response to the Applicant's argument, Hearn discloses the traffic manager 138 (*an inference engine for management of the ATM network*) also identifies traffic problems such as congestion on the network topology from database 130, data on traffic usage from database 132 and network problems from database 136, the traffic manager 138 finds solutions to traffic problems and then sends appropriate instructions to the other domain so as to reduce or overcome the problem (see col. 11 lines 37-47). The database 134 contains rules which are used in planning the network (see col. 11 lines 12-20).

Conclusion

Art Unit: 2661

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any response to this final action should be mailed to:

Box AF

Commissioner of Patents and Trademarks

Washington, D.C. 20231

Or faxed to:

(703) 305-9051, (for formal communications; please mark "EXPEDITED
PROCEDURE")

Or:

(703) 308-5403 (for informal or draft communications, please label
"PROPOSED" or "DRAFT")

Art Unit: 2661

Hand-delivered responses should be brought to Crystal Park II, 2021 Crystal Drive, Arlington, VA., Sixth Floor (Receptionist).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Bob A. Phunkulh** whose telephone number is **(703) 308-8251**. The examiner can normally be reached on Monday-Friday from 7:00 A.M. to 4:00 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor **Douglas W. Olms**, can be reach on **(703) 305-4703**. The fax phone number for this group is **(703) 872-9314**.

Any inquire of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is **(703) 306-0377**.
